A Short History of the World

Chapter 1: The Agricultural Revolution

The Agricultural Revolution, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Agricultural Revolution, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Agricultural Revolution, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Agricultural Revolution, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Agricultural Revolution, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Agricultural Revolution, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 2: Mesopotamia

Mesopotamia, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Mesopotamia, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Mesopotamia, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Mesopotamia, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Mesopotamia, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Mesopotamia, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 3: Ancient Egypt

Ancient Egypt, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Egypt, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Egypt, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Egypt, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Egypt, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Egypt, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 4: The Indus Valley

The Indus Valley, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Indus Valley, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Indus Valley, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Indus Valley, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Indus Valley, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Indus Valley, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 5: Ancient China

Ancient China, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient China, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient China, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient China, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient China, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient China, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 6: Ancient Greece

Ancient Greece, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Greece, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Greece, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Greece, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Greece, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Ancient Greece, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 7: The Roman Republic

The Roman Republic, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Republic, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Republic, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Republic, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Republic, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Republic, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 8: The Roman Empire

The Roman Empire, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Empire, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Empire, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Empire, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Empire, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Roman Empire, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 9: The Silk Road

The Silk Road, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Silk Road, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Silk Road, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Silk Road, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Silk Road, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Silk Road, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 10: The Byzantine Empire

The Byzantine Empire, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Byzantine Empire, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Byzantine Empire, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Byzantine Empire, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Byzantine Empire, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Byzantine Empire, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 11: The Islamic Golden Age

The Islamic Golden Age, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Islamic Golden Age, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Islamic Golden Age, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Islamic Golden Age, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Islamic Golden Age, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Islamic Golden Age, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 12: Medieval Europe

Medieval Europe, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Medieval Europe, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Medieval Europe, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Medieval Europe, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Medieval Europe, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Medieval Europe, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 13: The Mongol Empire

The Mongol Empire, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Mongol Empire, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Mongol Empire, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Mongol Empire, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Mongol Empire, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Mongol Empire, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 14: The Renaissance

The Renaissance, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Renaissance, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Renaissance, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Renaissance, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Renaissance, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Renaissance, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 15: The Age of Exploration

The Age of Exploration, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Age of Exploration, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Age of Exploration, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Age of Exploration, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Age of Exploration, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Age of Exploration, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 16: The Reformation

The Reformation, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Reformation, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Reformation, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Reformation, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Reformation, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Reformation, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 17: The Scientific Revolution

The Scientific Revolution, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Scientific Revolution, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Scientific Revolution, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Scientific Revolution, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Scientific Revolution, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Scientific Revolution, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 18: The Enlightenment

The Enlightenment, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Enlightenment, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Enlightenment, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Enlightenment, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Enlightenment, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Enlightenment, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 19: The American Revolution

The American Revolution, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The American Revolution, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The American Revolution, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The American Revolution, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The American Revolution, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The American Revolution, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 20: The French Revolution

The French Revolution, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The French Revolution, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The French Revolution, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The French Revolution, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The French Revolution, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The French Revolution, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 21: The Industrial Revolution

The Industrial Revolution, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Industrial Revolution, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Industrial Revolution, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Industrial Revolution, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Industrial Revolution, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Industrial Revolution, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 22: Nationalism in the 19th Century

Nationalism in the 19th Century, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Nationalism in the 19th Century, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Nationalism in the 19th Century, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Nationalism in the 19th Century, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Nationalism in the 19th Century, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Nationalism in the 19th Century, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 23: Imperialism

Imperialism, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Imperialism, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Imperialism, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Imperialism, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Imperialism, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Imperialism, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 24: World War I

World War I, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War I, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War I, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War I, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War I, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War I, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 25: The Interwar Years

The Interwar Years, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Interwar Years, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Interwar Years, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Interwar Years, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Interwar Years, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Interwar Years, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 26: World War II

World War II, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War II, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War II, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War II, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War II, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

World War II, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 27: The Cold War

The Cold War, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Cold War, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Cold War, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Cold War, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Cold War, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Cold War, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 28: Decolonization

Decolonization, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Decolonization, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Decolonization, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Decolonization, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Decolonization, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Decolonization, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 29: The Digital Age

The Digital Age, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Digital Age, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Digital Age, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Digital Age, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Digital Age, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

The Digital Age, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Chapter 30: Globalization

Globalization, part 1. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Globalization, part 2. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Globalization, part 3. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Globalization, part 4. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Globalization, part 5. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.

Globalization, part 6. Historians study this period through written sources, archaeology and art. In this part we look at how people lived, what they believed, how they traded and governed, and which changes from this era shaped later centuries. Key causes and consequences are compared with earlier chapters so that students can see continuity and change over time.
